# How to Set up your Directv HDTV Receiver

Written By: Brian Sallee

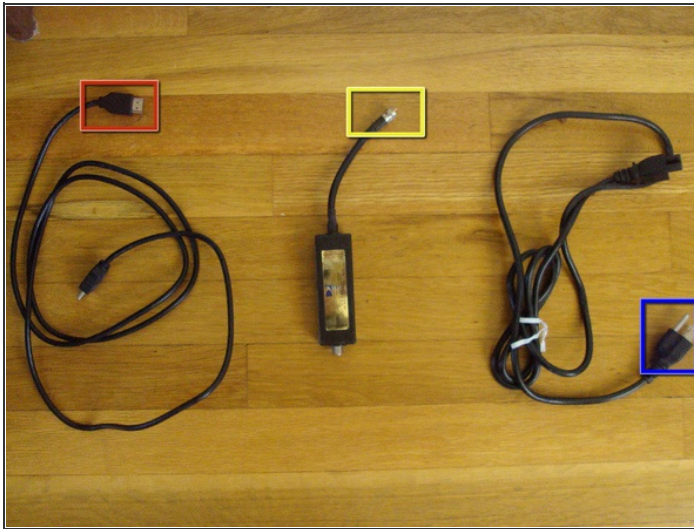

## **PARTS:**

- [DirecTV Satellite Receiver \(1\)](#)
- [HDMI Cable \(1\)](#)
- [Converter Module \(1\)](#)
- [Power Cord \(1\)](#)

## **SUMMARY**

Follow our simple step-by-step guide and you will be watching High Definition Television in minutes

## Step 1 — Getting Started

- You need 1 HDMI cable (required for HDTV)
- Converter Module
- Power Cord
- Directv HDTV Receiver and Remote
- [TroubleShooting Doc](#)
- \* [So you broke your display...](#)

## Step 2

- Connect Cable from Satellite to Converter Module
- [Email Coach Mike|mailto:coachmike@gmail.com]

### Step 3

- Connect Converter Module to HDTV Receiver
- Make sure to connect the converter module cable to the **Satellite In**

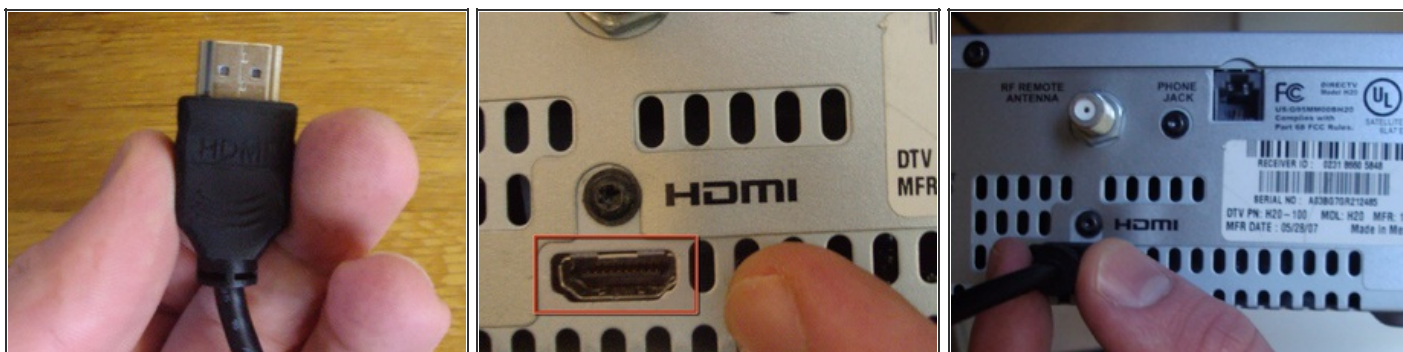

### Step 4 — Power Up

- Connect Power Cable to HDTV Receiver

## Step 5 — HDMI

- Plug the HDMI cable into the HDTV Receiver

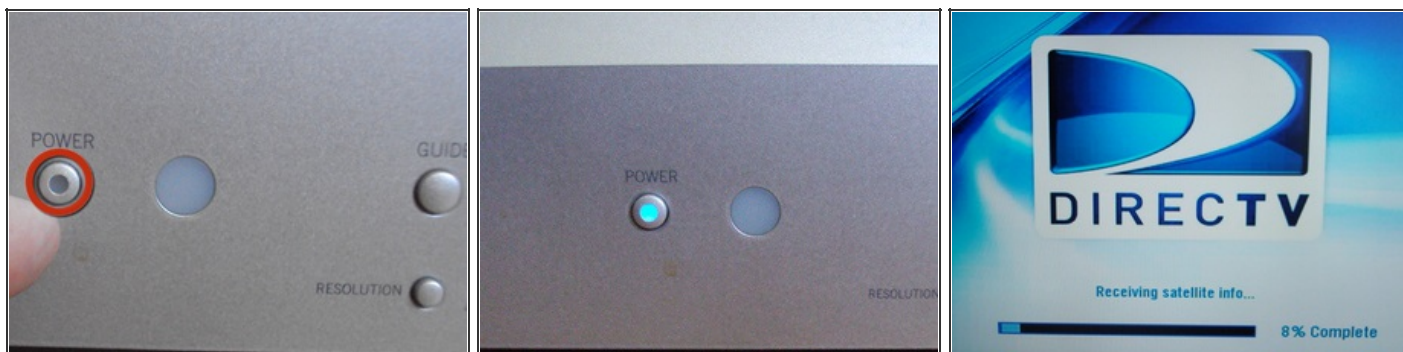

## Step 6

- Plug the HDMI Cable into the HDMI port on the back or side of your TV
- Most high definition televisions have multiple HDMI Ports. Choose the port that is most convenient for you to access

## Step 7 — Power on the HDTV Receiver

- Once the receiver is turned **ON** your screen should display the Directv logo and a status bar indicating that your receiver is working and receiving satellite info
- Be sure to select the HDMI port that you are using as the source on your television
- For example, if you are using HDMI port #1- then your TV should be tuned to the source **HDMI1**

## Step 8 — Resolution

- Adjust the output **Resolution** on your HDTV Receiver
- Choose the best resolution that your TV displays. Most HDTV's are either 720p or 1080i screen resolution

You can now enjoy High Definition Television, Congratulations!
